Standard Varies Per Practice

eCW MSH Sample:

```
MSH|^~\&|{SENDAPP}|{SENDERFACILITY}|{RECEIVEAPP}|{RECEIVEDFACILITY}|{MSG  
TRANSMITTEDDATE}|ADT^A04|P|2.3
```

Comments:

Schedule-Based ADT Outbound Interface

The following Schedule-Based ADT Outbound Interface functionalities must be configured.

Insurance Configuration:

Send all the insurances added to patient record (includes primary, secondary, tertiary, etc.)

Send primary insurance only

Send emergency contact information

Send responsible party

Schedule-Based ADT Filters: Select from the following list if the appointments must only be sent out from eCW for the selected filters. If no options are selected, all new and updated demographics are sent.

By Resource

By Provider

By Facility

By Visit Type

By Visit Status

By Diagnosis Code

Do not send ADT messages if external MRN is present (Check with the tech team)

Do not send ADT messages without external MRN

Do not send ADT message if the patient is deceased

Do not send ADT message if the patient is inactive

Do not send ADT message if the race field for the patient is blank

Send ADT message only on patient creation and do not send patient updates

Note: If any specific data from the patient demographics must be transmitted, it is added under the Structured Data section. This requires the structured data element to be created by the practice.

eCW Patient Demographics: Select the items to be sent in the ADT message and enter the location in the HL7 message next to the selected items. If no location is mentioned, then the option will not be configured.
